FORMULATION GUIDELINES

1. Determine your client's natural hair color level using the **Color Gels Lacquers** Natural Warm (NW) family swatches found in the swatch book. Remember to consider percentage of gray, hair texture, condition, and hair density.
2. Determine the target color (final level and tone) desired by your client.
3. Determine the undertone found at the target level (see Color Wheel).
4. Select the **Color Gels Lacquers** shade to enhance, balance or counteract undertones and volume of developer needed to achieve the target color.

GUIDELINES FOR COVERING GRAY HAIR

To cover gray means to minimize the contrast between natural hair and gray hair. To maintain the most control when covering gray, select a formula no more than two levels lighter than the natural hair.
